⇔ Education

University of Maryland - College Park

Dual BS in Computer Science (Machine Learning&Quantum Information) and Mathematics

December 201

December 2025 | GPA: 3.5 University, CS Departmental Honors; BS/MS; Dean's List

- AI/ML: Intro to: AI, Data Science, ML;
 Graduate NLP
- Math: Calc III; Advanced Linear Algebra;
 Differential Equations; Advanced Calculus;
 Abstract Algebra; Mathematical Finance:
 Derivatives & Stochastic Models
- CS: Algorithms; Data Structures; Computer Systems; Object-Oriented Programming;
 Organization of Languages
- Stat: Applied Prob&Stat; Probability Theory

☐ Publications

- Ipelets for the Convex Polygonal Geometry, published at SoCG 2024, 2024
- AgreeMate: Teaching LLMs to Haggle, published at arXiv, 2024

<> Projects

Vizier (active) | Team Lead/ML Developer

- Al-powered platform for personalized newsletters
- (Full Pipeline: Content Aggregation → Monetization)
- Test-Time MoE agentic architecture for improved context retrieval via specialized document-expert LLM models

QSafe (active) | Solo Developer

- Open-Source Python/Rust Quantum-Safe password manager with lattice-based cryptography
- Secure Docker container core manager
- End-to-end encrypted CLI-container comm protocol

CoronaSafe | Team Lead/Backend Developer

Python/Flutter app for global COVID-19 risk

assessment

Analyzed real-time foot traffic and urban

- density using a time-weighted algorithm for predictive accuracy
 Award: Congressional App Challenge
- Winner: 2021 District MD08
 Recognition: Guest Speaker at 2022 US
- Patent and Trademark Office APPLY
 Yourself event

 Resourceful | Team Lead/Backend

DeveloperPython/Flutter app that connected

- underrepresented students to resources using NLP-driven searches
 Implemented advanced NLP techniques
- (e.g. NLTK, Spacy, and Cosine/Wu-Palmer similarities)Award: Best Education Award: 2022
- Blairhacks_5 Hackathon

 Skills

Programming: Python, C/C++, DevOps, Webhosting, Fullstack Development, API-

- creation, Design Paradigms

 Familiar: Java, Rust, Lua, MATLAB,
 Flutter/Dart, HTML5, CSS3,
 - JavaScript, Assembly

 ML/AI: Un/Supervised Learning, Deep RL,

 GANs
- Data Science: Statistical Analysis, Data
 Processing

 Finance: Brownian Motion, Black-Scholes,
- Arbitrage Pricing, Stochastic Calculus, Delta Hedging
- Tools & Technologies: Git, GitHub/Lab,
 Docker, SQL, Linux, Bash, WSL2, PyTorch,
 NumPy, Pandas, NLTK, Dask, Scipy, Plotly,
 Matplotlib, Spacy, Scikit-learn, Seaborn,
 TensorBoard, AWS SageMaker,

BeautifulSoup, React, Flask, RESTful,
Postman, Selenium, ROS, LaTeX,

Solving, Leadership, Technical Writing, Self-

Powershell, Memory Profiler
 Soft Skills: First-Principles Problem

teaching, Iterative Experimentation

Experience

Johns Hopkins University Applied Physics Laboratory

Computer Science Intern - Interim Security Clearance

Force Projection Sector: Ocean Systems & Engineering Group

May 2024 - Aug 2024 | Laurel, MD

- Implemented iteratively enhanced
 Generative Adversarial Imitation from
 Observation (GAlfO) agents substantially
 outperforming baseline imitation models
- Authored critical literature reviews on GAIfO and Generative AI, providing direct insights for future project strategies
- Developed an optimized GAIfO variant, using core-architectural insights from a literature review, which outperformed all prior versions over long timeframes
- Enhanced GTRI's SCRIMMAGE masssimulation framework with increased complexity and expert controller functionality
- Revamped GitLab Continuous Integration pipelines, boosting speed and efficiency by 25% while addressing security vulnerabilities
- Optimized project-wide Docker Image, used across all repositories, reducing pipeline build times by 50% and increasing memory efficiency by 40%
- Led winning team for sector Intern
 Challenge in developing a secure, non-GPS intra-campus navigation prototype

University of Maryland MIND Lab

Research Intern
Breathing Analysis Project
October 2023 - December 2024 | College Park,
MD

- Developed an advanced visualization dashboard for efficient analysis of mass breath data
- Designed dataset structures for visualization and feature extraction in future work
- Optimized massive dataset-loading using Dask and multithreading by over 400%

Implemented and evaluated supervised

learning techniques for improved breath segmentation

University of Maryland CMNSStudent Researcher

Crowd Simulation
 September 2024 - Present | College Park, MD
 Exploring application of non-Euclidean

- geometries
 Applying Transformers to crowd navigation,
- with focus on natural language goaldirection

 University of Maryland CMNS

Lead Teaching Assistant CMSC351H (Algorithms Honors)

Spring 2024 | College Park, MD

• Co-designed and graded homeworks,

exams, and lecture material for 38 honours students
 Conducted weekly office hours, providing

personalized guidance on advanced topics

Additional Qualifications

- Certifications: Complete Linear Algebra -Udemy; Algorithmic Toolbox - UCSD; Game Theory - Stanford
- Awards: National Merit; Dean's Scholarship;
 Eagle Scout; Congressional App Challenge
 Winner; ISKF Black Belt
- Languages: English (Native); Bengali (Native); Hindi (Intermediate); Spanish (Intermediate); French (Beginner)
