⇔ Education

University of Maryland - College Park

Dual BS in Computer Science (Machine Learning&Quantum Information) and **Mathematics**

December 2025 | GPA: 3.5

University, CS Departmental Honors; BS/MS; Dean's List

- AI/ML: Intro to: AI, Data Science, ML; Graduate NLP
- Math: Calc III; Advanced Linear Algebra; Differential Equations; Advanced Calculus; Abstract Algebra; Mathematical Finance: Derivatives & Stochastic Models
- **CS**: Algorithms; Data Structures; Computer Systems; Object-Oriented Programming; Organization of Languages
- **Stat**: Applied Prob&Stat; Probability Theory

Publications

- Ipelets for the Convex Polygonal Geometry, published at SoCG 2024, 2024
- AgreeMate: Teaching LLMs to Haggle, published at arXiv, 2024

Projects

Vizier (active) | Team Lead/ML Developer

- Al-powered platform for personalized newsletters
- (Full Pipeline: Content Aggregation → Monetization)
- Test-Time MoE agentic architecture for improved context retrieval via specialized document-expert LLM models

QSafe (active) | Solo Developer

- Open-Source Python/Rust Quantum-Safe password manager with lattice-based cryptography
- Secure Docker container core manager
- End-to-end encrypted CLI-container comm protocol

CoronaSafe | Team Lead/Backend Developer

Python/Flutter app for global COVID-19 risk

assessment

Analyzed real-time foot traffic and urban

density using a time-weighted algorithm for predictive accuracy

Award: Congressional App Challenge

- Winner: 2021 District MD08
- **Recognition:** Guest Speaker at 2022 US
- Patent and Trademark Office APPLY Yourself event Resourceful | Team Lead/Backend

Developer Python/Flutter app that connected

- underrepresented students to resources using NLP-driven searches Implemented advanced NLP techniques
- (e.g. NLTK, Spacy, and Cosine/Wu-Palmer similarities) **Award:** Best Education Award: 2022
- Blairhacks_5 Hackathon Skills

Programming: Python, C/C++, DevOps,

- Webhosting, Fullstack Development, APIcreation, Design Paradigms Familiar: Java, Rust, Lua, MATLAB, Flutter/Dart, HTML5, CSS3,
 - JavaScript, Assembly ML/AI: Un/Supervised Learning, Deep RL, GANs
- Data Science: Statistical Analysis, Data Processing
- **Finance**: Brownian Motion, Black-Scholes, Arbitrage Pricing, Stochastic Calculus, Delta Hedging
- Tools & Technologies: Git, GitHub/Lab, Docker, SQL, Linux, Bash, WSL2, PyTorch, NumPy, Pandas, NLTK, Dask, Scipy, Plotly, Matplotlib, Spacy, Scikit-learn, Seaborn,

TensorBoard, AWS SageMaker, BeautifulSoup, React, Flask, RESTful,

Postman, Selenium, ROS, LaTeX, Powershell, Memory Profiler

teaching, Iterative Experimentation

Soft Skills: First-Principles Problem Solving, Leadership, Technical Writing, Self-

Experience

Johns Hopkins University Applied **Physics Laboratory**

Computer Science Intern Force Projection Sector: Ocean Systems & Engineering Group

May 2024 - Aug 2024 | Laurel, MD

- **Implemented** iteratively enhanced Generative Adversarial Imitation from Observation (GAIfO) agents *substantially* outperforming baseline imitation models
- **Authored** critical literature reviews on GAIfO and Generative AI, providing *direct* insights for future project strategies
- **Developed** an optimized GAIfO variant, using core-architectural insights from a literature review, which outperformed all prior versions over long timeframes
- **Enhanced** GTRI's SCRIMMAGE masssimulation framework with increased complexity and expert controller functionality
- **Revamped** GitLab Continuous Integration pipelines, boosting speed and efficiency by 25% while addressing security vulnerabilities
- **Optimized** project-wide Docker Image, used across all repositories, reducing pipeline build times by **50% and increasing** memory efficiency by 40%
- **Led** winning team for sector Intern Challenge in developing a secure, non-GPS intra-campus navigation prototype

University of Maryland MIND Lab

Research Intern Breathing Analysis Project October 2023 - December 2024 | College Park, MD

- **Developed** an advanced visualization dashboard for efficient analysis of mass breath data
- **Designed** dataset structures for visualization and feature extraction in future work
- Optimized massive dataset-loading using Dask and multithreading by over 400%
- Implemented and evaluated supervised learning techniques for improved breath segmentation

University of Maryland CMNS Student Researcher

Crowd Simulation

September 2024 - Present | College Park, MD

Exploring application of non-Euclidean

- geometries **Applying** Transformers to crowd navigation,
- with focus on natural language goaldirection **University of Maryland CMNS**

Lead Teaching Assistant

CMSC351H (Algorithms Honors) Spring 2024 | College Park, MD Co-designed and graded homeworks,

- exams, and lecture material for 38 honours students Conducted weekly office hours, providing
- personalized guidance on advanced topics **Additional Qualifications**

Certifications: Complete Linear Algebra -Udemy; Algorithmic Toolbox - UCSD; Game

Theory - Stanford **Awards**: National Merit; Dean's Scholarship;

Eagle Scout; Congressional App Challenge

Winner; ISKF Black Belt **Languages**: English (Native); Bengali (Native); Hindi (Intermediate); Spanish

(Intermediate); French (Beginner)
